PROFESSIONAL SUMMARY

Recent IT graduate with hands-on experience building a cross-platform mobile app using React Native, Expo, and Firebase (Authentication, Firestore, Storage), and leading a six-person development team through it as a graduation project. Skilled in translating UI/UX designs into production-ready code and real-time database integration. Comfortable across the full app development lifecycle, from implementation through testing and deployment.

EDUCATION

Bachelor of Science in Information Technology

Saudi Electronic University | Jeddah, Saudi Arabia

Degree Requirements Completed (Internship in Progress)

GPA: 3.99 / 4.00

PROJECTS

- Reesha Mobile Art Marketplace App (Graduation Project) React Native, Expo, Firebase (Authentication, Firestore, Storage)
 - Led a team of six developers by assigning tasks, tracking progress, reviewing code, and managing merges into the main branch.
 - Managed Git branching strategy, resolved merge conflicts, and consolidated team contributions into a stable final codebase.
 - Developed and integrated React Native screens with Firebase services to support real-time data for three user roles: artists, buyers, and administrators.
 - Real Estate Auction Data Analysis (Group Project) Excel, Power BI
 - Cleaned and validated a real estate auction dataset by handling missing values, duplicates, and outliers using Excel.
 - Performed descriptive statistical analysis to identify sales trends and support data-driven decision-making.
 - Designed an interactive Power BI dashboard with KPI cards and filters to visualize auction performance.
 - Educational Platform Website (Group Project) HTML, PHP, MySQL
 - Built the core front-end layout using HTML and engineered the back-end architecture using PHP and MySQL for a dynamic educational platform.
 - Implemented database connectivity to support student review submission and retrieval using MySQL.
 - Recipe Finder Android App (Group Project) Java, Android Studio
 - Contributed to the design, testing, and validation of an Android application for searching, saving, and sharing recipes.
 - Verified application functionality and user navigation through systematic testing.
-

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, PHP

Frameworks & Libraries: React Native, Expo

Backend & Databases: Firebase (Authentication, Firestore, Storage), MySQL

Tools & Platforms: Git/GitHub, Android Studio, Excel, Power BI

Web Technologies: HTML, CSS

LANGUAGES

Arabic | Native

English | Fluent
